SDC HACKATHON 2026: RUNPOD PROOF OF USE (POU)

Team Name: Xeno Force

Project Name: ArcTalent

Selected Domain: Domain 1 (The Aiversecity Future-Ready Workforce Domain)

Model Deployed: Qwen/Qwen2.5-7B-Instruct via RunPod Serverless / Proxy

Summary of RunPod Utilization:

- Cloud GPU inference container hosting Qwen/Qwen2.5-7B-Instruct with OpenAI-compatible API serving.

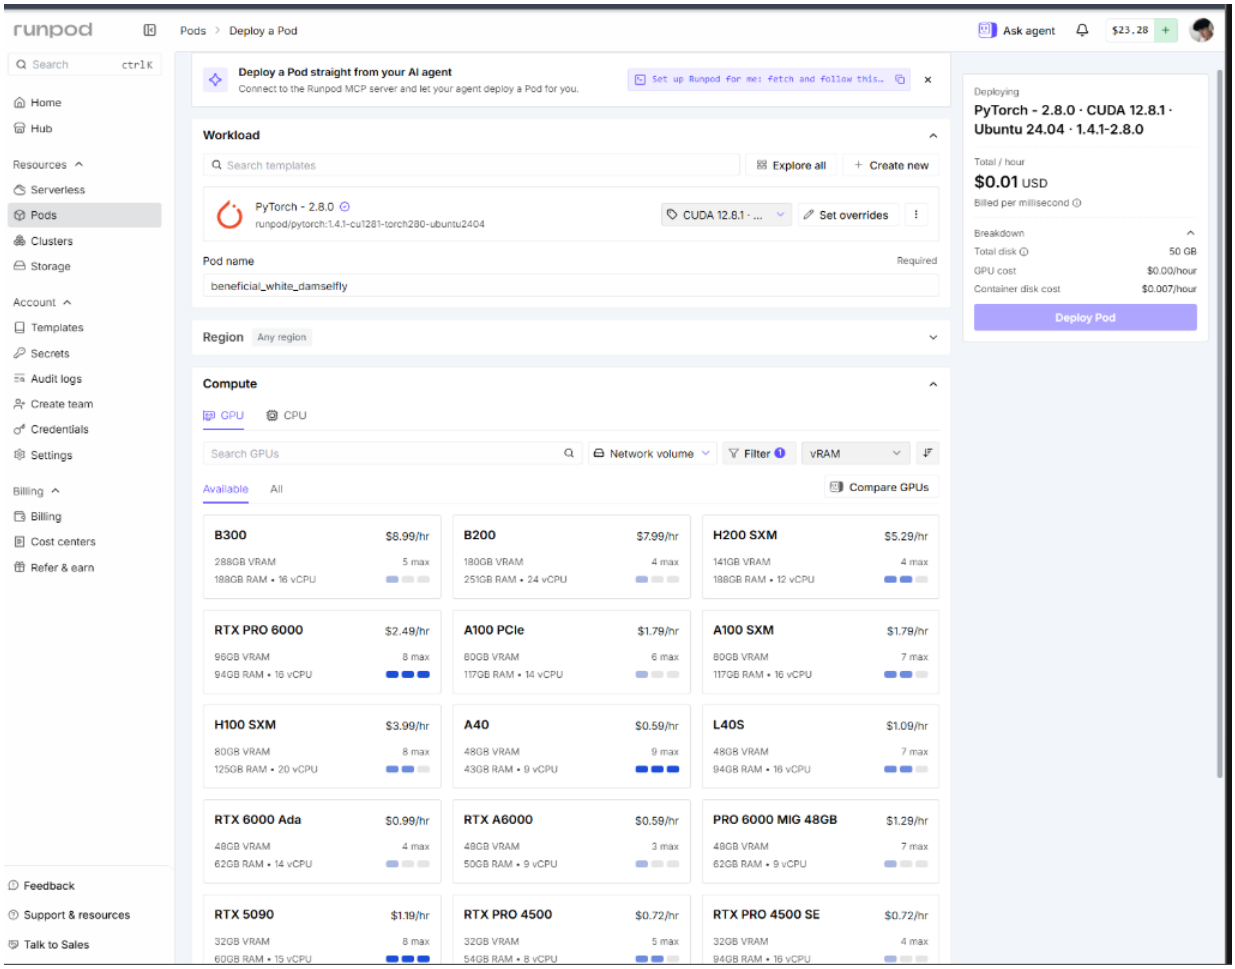

- Connected via Vercel AI SDK (@ai-sdk/openai-compatible) with structured schema decoding for CV skill extraction.

- Verbatim substring matching enforcement: candidate skills are verified against exact textual quotes to prevent hallucination.

- Verified account balance of $23.28 active credits utilized for hackathon inference workloads.

- Resilient fallback engine built-in: automatic local regex matching triggers if cloud GPU is idle or offline.

Verification Screenshot (Active RunPod Cloud Console):
